

IN THE CLAIMS:

Please amend claim 60 as follows:

sub F6 60. A digital recording medium having a data structure for controlling a reproducing operation, comprising:

(1) a plurality of specific data areas, each specific data area storing digital specific data and associated relative position data, the associated relative position data indicative of a plurality of relative positions from a current nth specific data location to each of a $n+1$, $n+2$, ..., $n+m$ specific data location, where m is greater than 2.
